

Title: Agile ScrumMaster

Location: Portsmouth, NH (Virtual)

Job Description:

We are a growing agile coaching and custom web and mobile app development firm in the New England area. We leverage years of experience building and leading software development teams to create award-winning products and to make our client companies more successful.

We are seeking someone to join us on a contract basis as an Agile Project Manager, typically called a ScrumMaster. Experience as a ScrumMaster is beneficial but not required. We provide our Scrum training to all new team members.

You will be orchestrating the daily work of one or more Scrum teams. You must be detail-oriented, self-disciplined, proactive, punctual and hold yourself accountable for the work you produce. You must be a team player with solid communication and client management skills.

Based on our mix of projects, there may also be opportunities to participate on a coaching team to teach the Scrum process to our clients. You would utilize a combination of classroom training and hands-on coaching and mentoring to lead agile transformations. Experience coaching development teams on Scrum concepts is a plus.

We are a virtual company, giving you the opportunity to work from a location of your choosing. You will attend a combination of on-site as well as remote meetings. As our current client base is in the New England area, living within one hour of Boston is preferable. Occasional overnight travel may be required depending upon the location of the client.

Familiarity with the following tools is a plus:

- JIRA
- Confluence
- Microsoft Office Suite

To apply, please provide a copy of your resume along with a cover letter detailing your interest and experience relevant to the position.

US citizenship is required. A background check and employer credit check are required to be completed before your contract can be signed.

Responsibilities:

This role is responsible for:

- Working with Scrum team members on software development projects.
- Organizing and conducting all Scrum ceremonies.
- Continuously engaging the team and empowering members to be as effective as possible.
- Leading the planning and execution of a given Sprint, while taking into account the team capacity, budget, and priorities.
- Working with Product Owner to ensure projects are moving along in alignment with the Product Owner's vision.
- Ensuring there are no blockers or impediments to communication or progress within the Scrum team.
